COMPUTER ENGINEERING

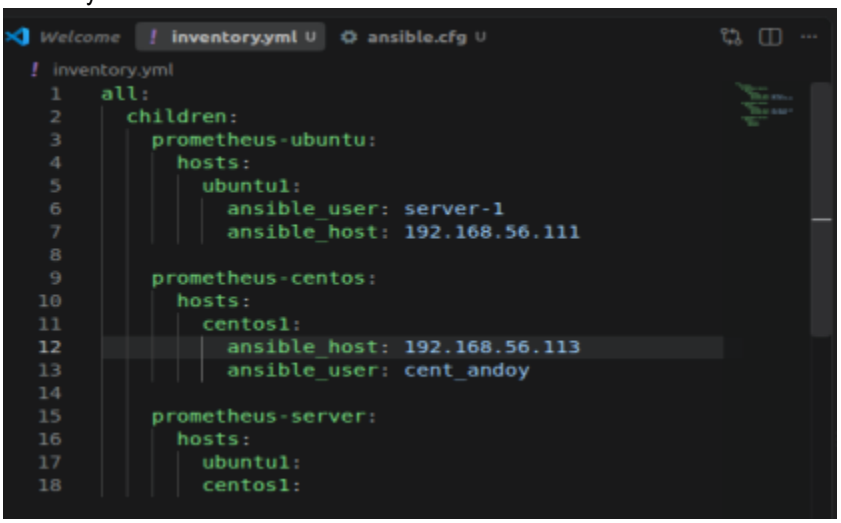

QUEZON CITY

COURSE CODE/TITLE:	CPE 212-Automating Server Management	**SECTION:**	CPE31S2 -
DATE PERFORMED:	24/09/26	**DATE SUBMITTED:**	24/09/26
NAME:	Francis Nikko I. Andoy	**INSTRUCTOR:**	Engr. Jimlord Quejado

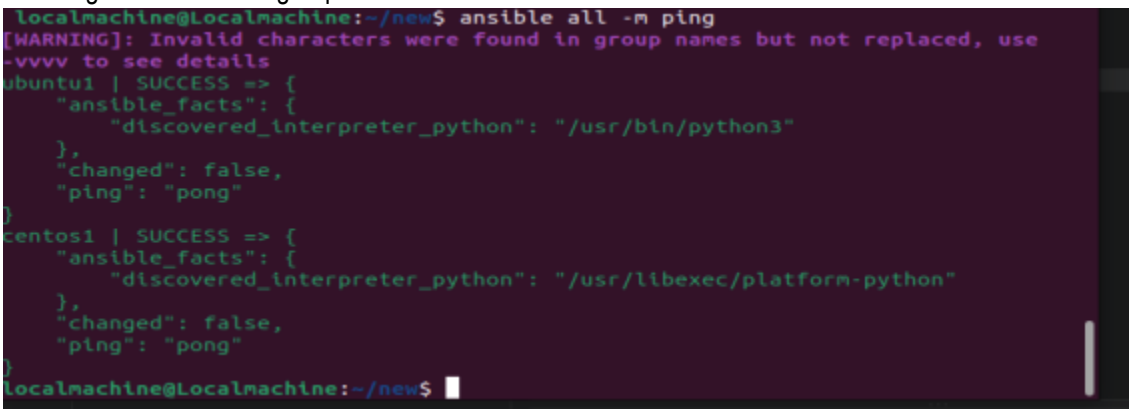

ACTIVITY NO. ___ [ACTIVITY NAME]

1. PROCEDURE OUTPUT

Inventory:

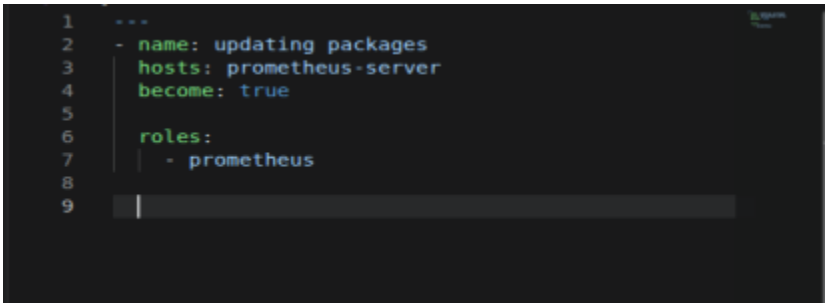

Checking the ssh and the group:

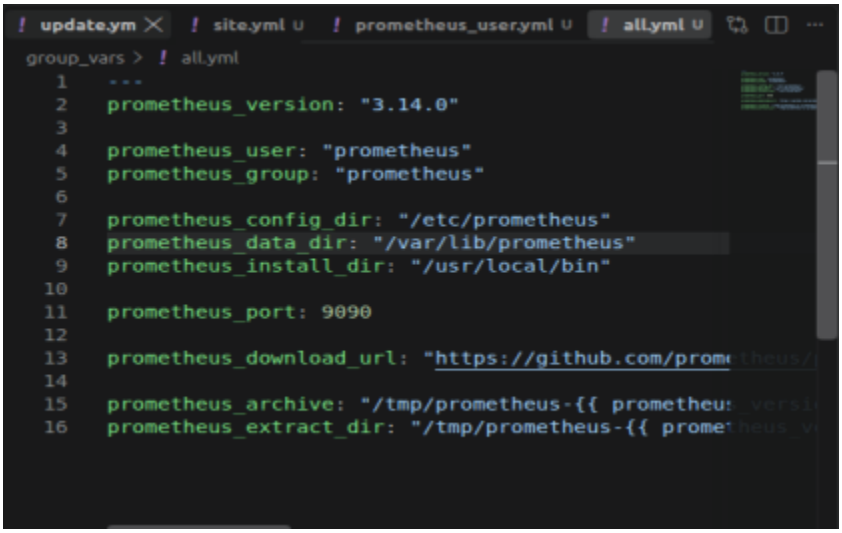

```
{
    "_meta": {
        "hostvars": {
            "centos1": {
                "ansible_host": "192.168.56.113",
                "ansible_user": "cent_andoy"
            },
            "ubuntu1": {
                "ansible_host": "192.168.56.111",
                "ansible_user": "server-1"
            }
        }
    },
    "all": {
        "children": [
            "prometheus-centos",
            "prometheus-server",
            "prometheus-ubuntu",
            "ungrouped"
        ]
    },
    "prometheus-centos": {
        "hosts": [
            "centos1"
```

Created a site.yml to be orchestra of the roles, this simplifies the work needed:

Created a group variables for simplifying the work this just can be used in tasks and other files later so that I just need to use the variables instead of the literal name:

Task 1: Prepare the Server

```
localmachine@Localmachine:~/new$ ansible-playbook -K site.yml
BECOME password:
[WARNING]: Invalid characters were found in group names but not replaced, use
-vvvv to see details

PLAY [updating packages] ***************************************************

TASK [Gathering Facts] *****************************************************
ok: [ubuntu1]
fatal: [centos1]: FAILED! => {"msg": "Incorrect sudo password"}

PLAY RECAP *****************************************************************
centos1                    : ok=0    changed=0    unreachable=0    failed=1
kipped=0    rescued=0    ignored=0
ubuntu1                    : ok=1    changed=0    unreachable=0    failed=0
kipped=0    rescued=0    ignored=0
```

Task 2: Create the Prometheus Us

```
PLAY [installing prometheus] ***********************************************

TASK [Gathering Facts] *****************************************************
fatal: [centos1]: UNREACHABLE! => {"changed": false, "msg": "Failed to connect to the host via ssh: ssh: Could not resolve hostname
centos1: Temporary failure in name resolution", "unreachable": true}
ok: [ubuntu1]

TASK [prometheus : Update package repository] ******************************
^[[A^[[B^C [ERROR]: User interrupted execution
localmachine@Localmachine:~/new$ ansible-playbook -K site.yml
BECOME password:
[WARNING]: Invalid characters were found in group names but not replaced, use
-vvvv to see details

PLAY [installing prometheus] ***********************************************

TASK [Gathering Facts] *****************************************************
fatal: [centos1]: UNREACHABLE! => {"changed": false, "msg": "Failed to connect to the host via ssh: ssh: Could not resolve hostname
centos1: Temporary failure in name resolution", "unreachable": true}
ok: [ubuntu1]

TASK [prometheus : Create Prometheus system user] ******************************
ok: [ubuntu1]

TASK [prometheus : Verify Prometheus user] *********************************
ok: [ubuntu1]

TASK [prometheus : Display Prometheus user information] ********************
ok: [ubuntu1] => {
    "prometheus_user_check.stdout": "uid=999(prometheus) gid=999(prometheus) groups=999(prometheus)"
}

PLAY RECAP *****************************************************************
centos1                    : ok=0    changed=0    unreachable=1    failed=0    skipped=0    rescued=0    ignored=0
ubuntu1                    : ok=4    changed=0    unreachable=0    failed=0    skipped=0    rescued=0    ignored=0

localmachine@Localmachine:~/new$
```

Task 3: Create Prometheus Directories

```
localmachine@Localmachine:~/new$ ansible-playbook -K site.yml
BECOME password:
[WARNING]: Invalid characters were found in group names but not replaced, use -vvvv to see details

PLAY [installing prometheus] ***********************************************

TASK [Gathering Facts] *****************************************************
fatal: [centos1]: UNREACHABLE! => {"changed": false, "msg": "Failed to connect to the host via ssh: ssh: Could not resolve hostname
centos1: Temporary failure in name resolution", "unreachable": true}
ok: [ubuntu1]

TASK [prometheus : Create Prometheus configuration directory] **************
ok: [ubuntu1]

TASK [prometheus : Create Prometheus data directory] ***********************
ok: [ubuntu1]

TASK [prometheus : Verify Prometheus directories] **************************
ok: [ubuntu1]

TASK [prometheus : Display Prometheus directory information] ***************
ok: [ubuntu1] => {
    "prometheus_directories.stdout": "drwxr-xr-x 2 prometheus prometheus 4096 Sep 24 09:45 /etc/prometheus\ndrwxr-xr-x 2 prometheus
prometheus 4096 Sep 24 09:45 /var/lib/prometheus"
}

PLAY RECAP *****************************************************************
centos1                    : ok=0    changed=0    unreachable=1    failed=0    skipped=0    rescued=0    ignored=0
ubuntu1                    : ok=5    changed=0    unreachable=0    failed=0    skipped=0    rescued=0    ignored=0

localmachine@Localmachine:~/new$
```

Task 4: Download Prometheus

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Conclusion:
In conclusion, I now understand how comple ansible is I also applied the simplified tasks so that I don't have to define the become true, tasks in every file. I created the main file to compile everything in the tasks that is needed. Additionally, the centos is having a problem I don't know how to debug the problem in centos it says that the sudo password is the error. In the end i removed the centos in my inventory.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used:

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use:

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use:

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
